

What is a 1/2 bet in sports betting?

In sports betting, the term "1/2" typically refers to a double bet in decimal odds format. For example, if you bet \$100 on Team 1 to win at odds of 1.50, and you also bet \$100 on Team 2 to win at odds of 1.50, you are placing a 1/2 bet. This means you are placing two separate bets on the same event or match. The total stake is \$200, and if both bets win, you would receive \$300 (your \$200 stake plus \$100 in profit).
