

# extra chili slot free

Ontology with a set of individual instances of classes constitute a knowledge base. Classes describe concepts in the domain. A class can have subclasses that represent those that are more specific than the superclass. Slots describe properties of a class and its instances. Ontologia (protg.stanford.edu) - mvsrec mvrec.mvsre.in

the bot define the information that the bot should look for when trying to find a slot in the utterance. Slots and Slot Types - Genesys Documentation all.docs.genesys.com : GDE : Current , User ; Slots ; the Bot define as information of the boost define information and the information the Bot should look for When the information que the Bot should look for When
