

eurowin bet

In horse betting, the potential payout for an exacta is typically higher than that of a trifecta. This is because an exacta requires bettors to correctly predict the first two horses to finish, while a trifecta requires bettors to correctly predict the first three horses to finish. The trifecta is often considered the toughest bet to hit, and the payout for a trifecta can be significantly higher than that of an exacta.

Horses are often grouped into different categories based on their performance and breeding. Some of the most popular categories include:
